Help

Searching for Terms

Enter the **term** you are searching for in the *Search For* field. Choose *Search* to start.

- Either a results list or the message *No terms found* will appear. If *No terms found* appears, check the spelling of the term or try broadening the search by using asterisks.

Note: You may use an asterisk (*) or more than one asterisk to search for incomplete words. The search does not distinguish between uppercase and lowercase letters.

Examples:

- The search combination *busin** will find all terms starting with the letters "busin".
- The search combination *Company ** will find all terms starting with "company" and "Company" followed by a space between it and the next word.
- The search combination *d*i!*b*u** will find all words using the letters in this order, such as *daily backup* and *distributable budget*.

Note: For system performance reasons you cannot search for all terms by using only a single asterisk in the *Search Term* field.

Language Settings

Select the *In All Languages* box to search for a term in every language. Leave the box unselected in order to **select the language direction** with the *From* and *To* dropdown boxes – the default source language is English and the default target language is German.

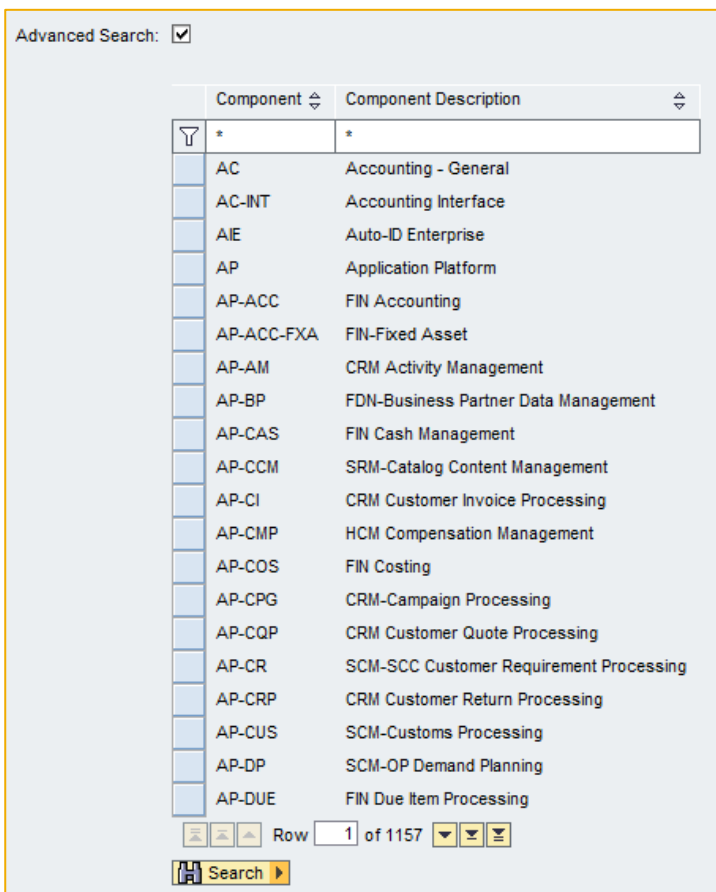

Quickly **reverse the language direction** by choosing the *Swap* button.

Choose *Only* for **monolingual search**. Select the language with the *From* dropdown box.

Advanced Search Settings

Leave the *Advanced Search* box deselected to search for terms in **all components** (i.e. subject fields) in the term database.

Select the box to **select components individually** or in groups.

Advanced Search:

Component	Component Description
* * *	* * *
AC	Accounting - General
AC-INT	Accounting Interface
AIE	Auto-ID Enterprise
AP	Application Platform
AP-ACC	FIN Accounting
AP-ACC-FXA	FIN-Fixed Asset
AP-AM	CRM Activity Management
AP-BP	FDN-Business Partner Data Management

AP-CQP	CRM Customer Quote Processing
AP-CR	SCM-SCC Customer Requirement Processing
AP-CRP	CRM Customer Return Processing
AP-CUS	SCM-Customs Processing
AP-DP	SCM-OP Demand Planning
AP-DUE	FIN Due Item Processing

Row 1 of 1157

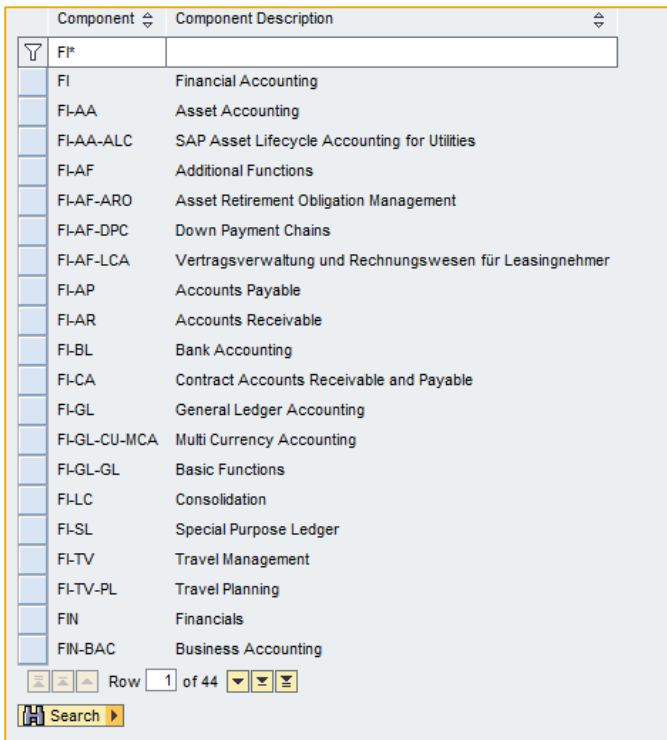

Search

Use the *Filter* and *Sort* functions to search for and reorganize individual or grouped components.

Note: You may use an asterisk (*) or more than one asterisk to search for incomplete words. The search does not distinguish between uppercase and lowercase letters.

Examples:

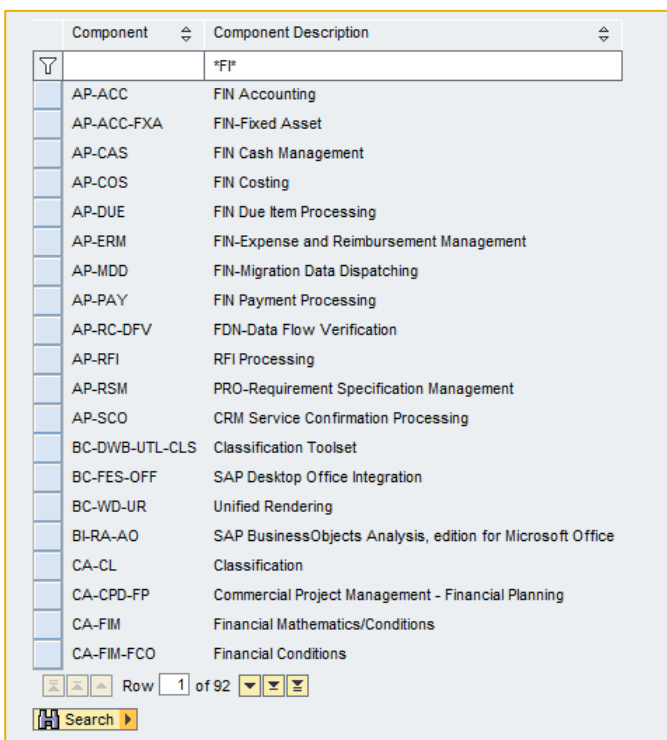

- Entering FI*in the *Component* field and selecting the *Filter* symbol will find all component abbreviations starting with the letters "FI".

The screenshot shows a table with two columns: 'Component' and 'Component Description'. A filter icon is active in the 'Component' column, and the filter text 'FI*' is entered in the adjacent input field. The table lists various component abbreviations and their descriptions, all starting with 'FI'. At the bottom, there are navigation icons and a 'Row 1 of 44' indicator.

Component	Component Description
FI	Financial Accounting
FI-AA	Asset Accounting
FI-AA-ALC	SAP Asset Lifecycle Accounting for Utilities
FI-AF	Additional Functions
FI-AF-ARO	Asset Retirement Obligation Management
FI-AF-DPC	Down Payment Chains
FI-AF-LCA	Vertragsverwaltung und Rechnungswesen für Leasingnehmer
FI-AP	Accounts Payable
FI-AR	Accounts Receivable
FI-BL	Bank Accounting
FI-CA	Contract Accounts Receivable and Payable
FI-GL	General Ledger Accounting
FI-GL-CU-MCA	Multi Currency Accounting
FI-GL-GL	Basic Functions
FI-LC	Consolidation
FI-SL	Special Purpose Ledger
FI-TV	Travel Management
FI-TV-PL	Travel Planning
FIN	Financials
FIN-BAC	Business Accounting

- Entering *FI*in the *Component Description* field and selecting the *Filter* symbol will find all component names that include the letters "FI".

The screenshot shows a table with two columns: 'Component' and 'Component Description'. A filter icon is active in the 'Component Description' column, and the filter text '*FI*' is entered in the adjacent input field. The table lists various component abbreviations and their descriptions, all containing the letters 'FI'. At the bottom, there are navigation icons and a 'Row 1 of 92' indicator.

Component	Component Description
AP-ACC	FIN Accounting
AP-ACC-FXA	FIN-Fixed Asset
AP-CAS	FIN Cash Management
AP-COS	FIN Costing
AP-DUE	FIN Due Item Processing
AP-ERM	FIN-Expense and Reimbursement Management
AP-MDD	FIN-Migration Data Dispatching
AP-PAY	FIN Payment Processing
AP-RC-DFV	FDN-Data Flow Verification
AP-RFI	RFI Processing
AP-RSM	PRO-Requirement Specification Management
AP-SCO	CRM Service Confirmation Processing
BC-DWB-UTL-CLS	Classification Toolset
BC-FES-OFF	SAP Desktop Office Integration
BC-WD-UR	Unified Rendering
BI-RA-AO	SAP BusinessObjects Analysis, edition for Microsoft Office
CA-CL	Classification
CA-CPD-FP	Commercial Project Management - Financial Planning
CA-FIM	Financial Mathematics/Conditions
CA-FIM-FCO	Financial Conditions

- Choosing the *Sort* symbol for the *Component Description* field will reorganize the list using the selected component (i.e. subject field) names in alphabetical order.

Component	Component Description
	FI
FS-BA-PM-AFP	Accounting for Financial Products
SCM-ICH-ASN	Advanced Shipping Notification and Shipment
IS-M-AMC	Advertising Management Classified

Search

Displaying Terms

When a results list appears the **number of results** matching the search parameters appears at the top of the list followed by an overview of basic term entry information.

Term Type	English	German	Component	Definition
5 Hit(s) Found				
	controlling area merge	Kostenrechnungskreis-Zusammenführung	CA-LT	
	controlling area rename	Kostenrechnungskreis-Umbenennung	CA-LT	
	controlling account		SBO	An account that records totals of amounts entered in a subsidiary ledger. ...
	controlling view	Kontierungssicht	PA-CP	Assigning planning data to account assignment objects (for example, to cos ...
	controlling level	Controlling-Ebene	CO-PC	A tool that, in Product Cost Controlling, enables you to determine the lev ...

The list automatically sorts alphabetically by term. Use the *Sort* function to change the sorting using any named column, either ascending or descending.

- The **term type** is the classification of the term entry. Place the cursor over the term type symbol for floating help explanations.
- The **term in the search language** is paired with the **equivalent term** in the other language.

Click on the term or its equivalent to see additional details for the entry. If the term entry in the results list is a **variant** of a term (such as a synonym or an abbreviation) click on that entry to see the main entry in the details.

If a term does not appear with an equivalent in the other language, the equivalent has not yet been translated or validated in the central SAPterm database.

- Click on the **Additional Languages symbol**  to see equivalent terms when available in additional languages. Scroll down to see all terms.
- If a term entry has **definitions** in the search language these will appear with the term.
- The abbreviation of the **component** indicates the subject field of the term.

Use the *Filter* function to limit the list further by component.

- Click on the **Other Components symbol**  if it appears in the far column to see additional subject fields in which the term is used.

Choose *Back* to **leave the results list** and return to the search screen.

Tip: If the SAPterm.com frame makes it difficult to scroll between items, choose ***Open in full screen mode*** at the top of the page.
